ORCHID PLANTS

ORCHID
PLANTS

Cattleya, Cymbidium, Cyrtopogon, Dendrobium and Phalaenopsis are all seedling and mature plant sizes. Our interest in the orchid industry began in April 1915 to November 1917. All plants are based upon a combination of the best of the parent plants and hybrid quality. Hybrid names before 1915 are in the 1947 edition of Sanders list where they are listed. Hybrid names after 1915 are those published with descriptions in the 1947 and 1948 issues of the American Orchid Society Bulletin.

We especially invite your attention to the Cattleya hybrids made with our justly famous IC. Sea Queen parent. We believe all of these crosses will be of exceptionally fine quality and will seriously merit your consideration if you are building up a collection of outstanding Cattleyas.

Plants will be shipped by Railway Express on the mainland and by Air Express overseas unless otherwise specified. We qualify for shipments to Hawaii and need only your permit number to complete the shipment. Terms cash with order; \$10.00 minimum packing free of charge. Shipping costs are in addition.

CATTLEYA

GENERAL CATALOGUE

1949

Plant No.	NAME AND DESCRIPTION	Price
174	BRASSOCATTLEYA MINERVA (BC. Mrs. J. Leeman x C. Dewiana aurea) - - - - - Fine forms of the well-known parents were used in this cross. Both have yellow petals and sepals with dark lips. The Mrs. J. Leeman blooms in the autumn. Seedlings in 2" pots.	\$4.00
175	CATTLEYA MEROPE x C. GIGAS var. M. BEYREDT - - - - - Flowers of both parents have white sepals and petals with purple lips. The flowers are ornamented with pale yellow areas. Both bloom in the late spring and early summer. Seedlings in 2" pots.	\$4.00
181	CATTLEYA AVERILL (C. Leeman x C. gigas var. M. Beyredt) - - - - - This is a mating between two clear whites with purple lips marked with yellow eyes. Both bloom in June or July. Seedlings in 2" pots.	\$3.50
185	LAELIOCATTLEYA KENOSHA x C. MEROPE - - - - - Both plants are whites with purple lips and both are very floriferous. IC. Kenosha is a Sargent cross. Blooming season indefinite. Seedlings in 2" pots.	\$3.00
186	CATTLEYA GIGAS x IC. BLACK HAWK - - - - - The first parent is a form of the large-leaved summer bloomer, while the second parent is vigorous. Both have white flowers with purple lips. Blooming in the autumn. Seedlings in 2" pots.	\$4.00
187	LAELIOCATTLEYA LAM HOUTON x IC. BIRDEL - - - - - The rich purple lip of the first parent is a very desirable feature. The flowers are brightened with a clear yellow eyes. IC. Birbel is a very desirable growth habit.	\$5.00
188	LAELIOCATTLEYA LAM HOUTON x C. GIGAS - - - - - The first parent is a form of the large-leaved summer bloomer, while the second parent is vigorous. Both have white flowers with purple lips. Blooming in the autumn. Seedlings in 2" pots.	\$3.50

ORCHID PLANTS

GENERAL CATALOGUE FOR 1949

Cattleya, Cymbidium, Cypripedium, Dendrobium and Phalaenopsis are offered in this catalogue in both seedling and mature plant sizes. Our shipping season is from April 15th to November 1st, 1949. Prices of all plants are based upon a combination of both plant size and hybrid quality. Hybrid names follow those in the 1947 edition of Sonders list where possible. For plants which have bloomed since 1946, the names are those published, with descriptions, in various 1948 issues of the American Orchid Society Bulletin.

We especially invite your attention to the Cattleya hybrids made with our justly famous LC. Red Oak as one parent. We believe all of these crosses will be of exceptionally fine quality and will seriously merit your consideration if you are building up a collection of outstanding Cattleyas.

Plants will be shipped by Railway Express on the mainland and by Air Express overseas unless otherwise specified. We qualify for shipments to Hawaii and need only your permit number to complete the shipment. Terms: cash with order; \$10.00 minimum; packing free of charge; shipping costs are in addition.

CATTLEYA

Plant No.	NAME AND DESCRIPTION	Price per Pot
174	BRASSOCATTLEYA MINERVA (BC. Mrs. J. Leeman x C. Dowiana aurea) - - - - Fine forms of the well-known parents were used in this cross. Both have yellow petals and sepals with dark lips. The Mrs. J. Leeman blooms in the autumn. Seedlings in 2" pots.	\$4.00
179	CATTLEYA MEROPE X C. GIGAS var. M. BEYRODT - - - - - Flowers of both parents have white sepals and petals and purple lips. The throats are ornamented with pale yellow areas. Both bloom in the late spring and early summer. Seedlings in 2" pots.	\$4.00
182	CATTLEYA AVERILL (C. Leomos x C. gigas var. M. Beyrodt) - - - - - This is a mating between two clear whites with purple lips marked with yellow eyes. Both bloom in June or July. Seedlings in 2" pots.	\$3.50
185	LAELIOCATTLEYA KENOSHA X C. MEROPE - - - - - Both plants are whites with purple lips and both are very floriferous. LC. Kenosha is a Sargon cross. Blooming season indefinite. Seedlings in 2" pots.	\$3.00
186	CATTLEYA GIGAS X LC. BLACK HAWK - - - - - The first parent is a fine form of this large-flowered summer species, while the second parent is vigorous and floriferous, with very dark flowers, blooming in the autumn. Seedlings in 2" pots.	\$3.00
187	LAELIOCATTLEYA SAM HOUSTON x BLC. ISHBEL - - - - - The rich purple lips of the summer-flowering Sam Houston are brightened with a clear yellow eyes. BLC. Ishbel blooms in the spring. It has good color and texture, and a very desirable growth habit. Seedlings in 2" pots.	\$5.00
191	LAELIOCATTLEYA RED OAK x C. MONONA - - - - - These parents are two of our best stud plants. The hybrid should bear well-colored flowers of fine form. Red Oak blooms in autumn and Monona in spring. Seedlings in 2" pots.	\$3.50

Clarelen Orchids

Plant No.	NAME AND DESCRIPTION	Price per Pot
205	CATTLEYA TRIANAEI var. THE PREMIER F.C.C., R.H.S. X LC. TREMPAULEAU - - - This well known variety of trianaei was mated with one of the first to bloom from our line of large flowered, brilliantly colored autumnal hybrids derived from LC. Red Oak. Seedlings in 2" pots.	\$2.50
210	LAELIOCATTLEYA ROBERT PATERSON X C. MONONA - - - - - The parent selected from our stock of the first plant has dark flowers whose lips are marked with yellow veins and reddened at the opening of the mouth. May. The Monona parent bears well formed flowers of medium shade and has a fine habit of growth. March-May. Seedlings in 2" pots.	\$2.00
225	CATTLEYA HAROLD alba X C. MOSSIAE Wageri - - - - - This cross between two famous whites has exceptional vegetative vigor. Seedlings in 2" pots.	\$3.50
228	CATTLEYA MOSSIAE, Dale's Royal King x C. TOWER - - - - - Both parents are very floriferous. The blooming season should be in winter and spring. Seedlings in 2" pots.	\$2.50
230	CATTLEYA HARDYANA X C. TOWER - - - - - The Hardyana is a free-flowering plant, producing medium dark flowers with velvety lips strikingly eyed with yellow in summer. The Tower plant produces dark flowers of good texture in the autumn. The lip is reddish purple marked with golden yellow veins in the throat. Seedlings in 2" pots.	\$3.00
240	CATTLEYA ALWYNII alba X LC. KENOSHA - - - - - Another cross between two excellent parents having white flowers with purple lips. Seedlings in 2" pots.	\$4.00
241	CATTLEYA ENID var. CLARELEN X C. KEGONSA - - - - - C. Kegonsa is a cross between Prince John and King George. It should blend well with our vigorous strain of C. Enid. Seedlings in 2" pots.	\$4.00
242	LAELIOCATTLEYA WAUPACA X LC. BLACK HAWK - - - - - The Waupaca parent bears medium dark flowers of large size and good texture in the early winter. The throat shades towards a rich purple marked with yellow eyes. The Black Hawk parent has the same season and similarly marked throat but the petals and sepals are much darker and more conspicuously reticulate. Seedlings in 2" pots.	\$3.50
243	CATTLEYA TOWER X C. PRINCESS ROYAL - - - - - Both parents have flowers of fine form and clear color. Seedlings in 2" pots.	\$2.50
245	LAELIOCATTLEYA TREMPAULEAU X LC. WAUPACA - - - - - The parents are autumn blooming. Flowers are of exhibition quality, being richly colored, large, broad-petalled, well proportioned, and of good texture. Seedlings in 2" pots.	\$4.00
248	LAELIOCATTLEYA TREMPAULEAU X C. TITRIANAE - - - - - LC. Trempealeau is a Red Oak cross and should contribute good form and color to an excellent C. Titrianae. Seedlings in 2" pots.	\$4.00
275	LAELIOCATTLEYA COSETTE X LC. TREMPAULEAU - - - - - Both parents bloom in the autumn. Flowers of very fine quality are expected. Seedlings in 2" pots.	\$3.50
276	CATTLEYA TRIANAEI X LC. NEON - - - - - These sturdy seedlings should produce flowers of rich coloration as both parents have very dark petals and sepals. Seedlings in 2" pots.	\$4.50

Clarelen Orchids

Plant No.	NAME AND DESCRIPTION	Price per Pot
202	CATTLEYA TRIANAEL var. THE PREMIER F.C.C., R.H.S. X LC. TREMPEREAULEAU - This well known variety of trianaei was mated with one of the first to bloom from our line of large flowered, brilliantly colored autumnal hybrids derived from LC. Red Oak. Seedlings in 2" pots.	\$2.50
210	LAELIO-CATTLEYA ROBERT PATERSON X C. MONONA The parent selected from our stock of the first plant has dark flowers whose lips are marked with yellow veins and reddened at the opening of the mouth. May. The non-parent bears well formed flowers of medium shade and has a fine habit of growth. March-May. Seedlings in 2" pots.	\$2.50
222	CATTLEYA HAROLD alba X C. MOSSIAE Wagereri This cross between two famous whites has exceptional vegetative vigor. Seedlings in 2" pots.	\$2.50
228	CATTLEYA MOSSIAE, Daisy's Royal King X C. TOWER - Both parents are very floriferous. The blooming season should be in winter and spring. Seedlings in 2" pots.	\$2.50
230	CATTLEYA HARDYANA X C. TOWER The Hardyana is a free-flowering plant, producing medium dark flowers with velvety lips strikingly eyed with yellow in summer. The Tower plant produces dark flowers of good texture in the autumn. The lip is reddish purple marked with golden yellow veins in the throat. Seedlings in 2" pots.	\$3.00
240	CATTLEYA ALWYNII alba X LC. KENOSHA Another cross between two excellent parents having white flowers with purple lips. Seedlings in 2" pots.	\$4.00
241	CATTLEYA ENID var. CLARELEN X C. KEGONSA C. Kegonsa is a cross between Prince John and King George. It should blend well with our vigorous strain of C. Enid. Seedlings in 2" pots.	\$4.00
242	LAELIO-CATTLEYA WAUPACA X LC. BLACK HAWK The Waupaca parent bears medium dark flowers of large size and good texture in the early winter. The throat shades towards a rich purple marked with yellow eyes. The Black Hawk parent has the same season and similarly marked throat but the petals and sepals are much darker and more conspicuously reticulate. Seedlings in 2" pots.	\$3.50
243	CATTLEYA TOWER X C. PRINCESS ROYAL - Both parents have flowers of fine form and clear color. Seedlings in 2" pots.	\$2.50
245	LAELIO-CATTLEYA TREMPEREAULEAU X LC. WAUPACA The parents are autumn blooming. Flowers are of exhibition quality, being richly colored, large, broad-petalled, well proportioned, and of good texture. Seedlings in 2" pots.	\$4.00
248	LAELIO-CATTLEYA TREMPEREAULEAU X C. TITRIANAE LC. Trempealeau is a Red Oak cross and should contribute good form and color to an excellent C. Titrianae. Seedlings in 2" pots.	\$4.00
252	LAELIO-CATTLEYA COSETTE X LC. TREMPEREAULEAU Both parents bloom in the autumn. Flowers of very fine quality are expected. Seedlings in 2" pots.	\$3.50
256	CATTLEYA TRIANAEL X LC. NEON These sturdy seedlings should produce flowers of rich coloration as both parents have very dark petals and sepals. Seedlings in 2" pots.	\$4.50

Charles Oakes

Plant No.	NAME AND DESCRIPTION	Price per Pot
54-S	LAELIOCATTLEYA LIBERATION ST. ANDRE X BC. CORRIENTES var. MAGNIFICA - - - The very dark lip of the first parent should accentuate the fine qualities of this famous Brasso. Both Bloom in autumn. Intermediate plants in 4½" pots.	\$15.00
62	CATTLEYA MONONA x L. PURPURATA var. MARIE LOUISE - - - - Both parents are spring bloomers with a desirable drying texture on aging. C. Monona has an enviable habit of compact growth within the pot. The second parent, in our experience, has been endowing its offspring with flushed petal tips. Intermediate plants in 4" pots.	\$10.00
65	LAELIOCATTLEYA BRITANIA alba x LC. CANHAMIANA alba - - - - Flowers of both parents are of extra fine shape and texture, with sepals and petals of pure white and lips of deep purple. Intermediates in 4" pots.	\$20.00
71	LAELIOCATTLEYA CANTAB x BC. BAYFIELD - - - - - The first parent is dark throughout with a broad ruffled lip. The second parent has a large, fringed Brasso lip with medium phlox petals and sepals. Both parents bloom in March. Intermediate plants in 4" pots.	\$17.50
74	LAELIOCATTLEYA NAKOMA x C. DOWIANA AUREA - - - - - Both parents have yellow petals and sepals with very dark purple lips. The hybrid shows exceptional vegetative vigor. Intermediates in 3" pots.	\$17.50
109	CATTLEYA WINGRA x LAELIOCATTLEYA BLACK HAWK - - - - - The former parent blooms in the late spring and has all of the good qualities of C. Dupreana, while the second, a freely flowering type with very dark flowers, is chiefly autumnal. Intermediates in 4½" pots.	\$12.50
122	CATTLEYA RAPHAELEDA x LC. RED OAK - - - - - Both parents have fine, bold flowers in the autumn and early winter. Intermediate plants in 3" pots.	\$15.00
124	CATTLEYA MONONA x C. GIGAS - - - - - Monona has large, phlox-colored flowers in the late spring with a Mossiae lip. The gigas parent used has exceptionally clear yellow eyes at the opening of the throat. Gigas blooms in early summer. Intermediate plants in 3" pots.	\$12.50
129	CATTLEYA R. CADWALADER X C. WINGRA - - - - - Both parents bloom in the spring and both have large, colorful flowers. Intermediates in 3½" pots.	\$10.00
134	CATTLEYA DOWIANA AUREA x LC. LA CROSSE - - - - - A very vigorous hybrid from autumn blooming parents with extra large, fine flowers. Intermediate plants in 4" pots.	\$20.00
135	LAELIOCATTLEYA BLACK HAWK x BC. APOLLO var. DUKE OF YORK - - - - The first parent is a free-flowering, vigorous hybrid with very dark flowers. Apollo also has dark flowers, marked with yellow eyes in the lip. Black Hawk is autumnal while Apollo blooms in the spring. Intermediates in 4" pots.	\$15.00
137	CATTLEYA LABIATA var. AUTUMNALIS x LC. RED OAK - - - - - The form of labiata chosen to serve as a parent in this cross has good color, size, and texture but differs from the usual in this species by having the reddish purple area of the lip restricted to a central bar running from the throat to the notch at the lip's forward margin. A nicely-eyed form of Red Oak was used as the other parent. Intermediates in 3½" pots.	\$20.00

Clarelen Orchids

Plant No.	NAME AND DESCRIPTION	Price per Pot
54-2	LAELIOCATTEYA LIBERATION ST. ANDRE X BC. CORRIENTES var. MAGNIFICA The very dark lip of the first parent should accentuate the fine qualities of this famous Brasso. Both bloom in autumn. Intermediate plants in 4 1/2" pots.	\$12.00
62	CATTLEYA MONONA x L. PURPURATA var. MARIE LOUISE Both parents are spring bloomers with a desirable drying texture on aging. C. Monona has an enviable habit of compact growth within the pot. The second parent, in our experience, has been endowing its offspring with flushed petal tips. Intermediate plants in 4" pots.	\$10.00
63	LAELIOCATTEYA BRITANNIA alba x LC. CANHAMIANA alba Flowers of both parents are of extra fine shape and texture, with sepals and petals of pure white and lips of deep purple. Intermediate plants in 4" pots.	\$10.00

74	LAELIOCATTEYA NAKOMA x C. DOWIANA AUREA Both parents have yellow petals and sepals with very dark purple lips. The hybrid shows excellent vegetative vigor. Intermediate plants in 3" pots.	\$12.50
109	CATTLEYA WINGRA x LAELIOCATTEYA BLACK HAWK The former parent blooms in the late spring and has all of the good qualities of C. Dupreana, while the second, a freely flowering type with very dark flowers, is chiefly autumnal. Intermediate plants in 4 1/2" pots.	\$12.50
122	CATTLEYA RAPHAELDA x LC. RED OAK Both parents have fine, bold flowers in the autumn and early winter. Intermediate plants in 3" pots.	\$12.50
124	CATTLEYA MONONA x C. GIGAS Monona has large, phlox-colored flowers in the late spring with a Moerise lip. The gigas parent used has exceptionally clear yellow eyes at the opening of the throat. Gigas blooms in early summer. Intermediate plants in 3" pots.	\$12.50
129	CATTLEYA R. CADWALADER x C. WINGRA Both parents bloom in the spring and both have large, colorful flowers. Intermediate plants in 3 1/2" pots.	\$10.00
134	CATTLEYA DOWIANA AUREA x LC. LA CROSSE A very vigorous hybrid from autumn blooming parents with extra large, fine flowers. Intermediate plants in 4" pots.	\$20.00
135	LAELIOCATTEYA BLACK HAWK x BC. APOLLO var. DUKE OF YORK The first parent is a free-flowering, vigorous hybrid with very dark flowers. Apollo also has dark flowers, marked with yellow eyes in the lip. Black Hawk is autumnal while Apollo blooms in the spring. Intermediate plants in 4" pots.	\$12.00
137	CATTLEYA LABIATA var. AUTUMNALIS x LC. RED OAK The form of labiate chosen to serve as a parent in this cross has good color, size, and texture but differs from the usual in this species by having the reddish purple area of the lip restricted to a central bar running from the throat to the notch at the lip's forward margin. A nicely-eyed form of Red Oak was used as the other parent. Intermediate plants in 3 1/2" pots.	\$20.00

Charles Oakes

Plant No.	NAME AND DESCRIPTION	Price per Pot
138	BRASSOCATTLEYA MARIE-MARIE x LC. RED OAK - - - - - The large flowers of this winterflowering Brasso should be darkened by Red Oak. Intermediates in 4" pots.	\$25.00
139	CATTLEYA TITRIANAE x BC. MARIE-MARIE - - - - - The former has large broad-petalled flowers suffused uniformly with pale phlox. The throat is brightened with broad yellow-orange eyes. The latter has petals and sepals of amparo purple. The throat is marked with yellow eyes. Both parents bloom in the winter. Intermediates in 3" pots.	\$10.00
141	CATTLEYA TOWER x LC. RED OAK - - - - - The Glasnevin variety of C. labiata was used in the Tower parent. The hybrid should have flowers of fine form and dark color. Both parents bloom in the late autumn and early winter. Intermediate plants in 4" pots.	\$25.00
142	CATTLEYA TOWER x C. ANNIE J. LINES - - - - - The lip of C. Tower is magenta overlaid with red, marked with orange veins and eyes. The second lip is deep purple and velvety. Both bloom in late autumn and early winter. Intermediates in 5" pots.	\$17.50
143	BRASSOLAELIOCATTLEYA CLIFTADA x LC. RED OAK - - - - - The Cliftada parent has a smoothly-distributed phlox color in petals and sepals. The lip is purple with a centrally located yellow area at the opening of the throat. Winter and spring. Intermediates in 3" pots.	\$15.00
156	LAELIOCATTLEYA LA CROSSE x LC. RED OAK - - - - - Both parents have large, dark rose-purple flowers of heavy texture. The lip on the last parent has a frilled edge and bright yellow eyes. Autumn and early winter. Should bloom in 1949. Intermediate plants in 3" pots.	\$15.00
176	LAELIOCATTLEYA NAKOMA x BC. MRS. J. LEEMAN - - - - - Nakoma has bright yellow petals contrasted with a rich deep purple lip; the throat is marked with orange. A fine yellow form of the well-known Mrs. J. Leeman was used. Both bloom in the autumn. Intermediates in 3" pots.	\$7.50
177	LAELIOCATTLEYA BLACK HAWK x LC. WAUBESA - - - - - Both parents produce medium dark flowers of good size and substance. Black Hawk blooms in early winter and Waubesa in late winter. Intermediates in 3½" pots.	\$6.00
183	BRASSOCATTLEYA MRS. J. LEEMAN x LC. SAM HOUSTON - - - - - Large richly colored flowers of good texture are expected. The blooming time should be variable. Intermediates in 3" pots.	\$9.00
188	CATTLEYA OLIVE PIERSON x C. LADY VEITCH - - - - - Both parents have white flowers of good form and texture. Lady Veitch blooms several times a year on consecutive leads. Intermediates in 3½" pots.	\$10.00
192	LAELIOCATTLEYA CALIFORNIA x C. DOWIANA - - - - - This mating involves two autumn blooming parents. The improved strain of C. Dowiana was obtained by crossing C. Dowiana aurea with C. Dowiana Rosita. LC. California has a richly colored lip. Intermediates in 3" pots.	\$5.00
193	LAELIOCATTLEYA KENOSHA x C. ENID var. ALBA - - - - - This is a mating between two parents which bear flowers with clear white petals and sepals and purple lips. Both bloom in the autumn. Intermediates in 3" pots.	\$5.00

Clarelen Orchids

Plant No.	NAME AND DESCRIPTION	Price per Pot
1	LAELIOCATTLEYA MARTINETTI (C. <i>Mossiae</i> x L. <i>tenebrosa</i>) - - - - - Petals and sepals of this old favorite are bronzed to varying degrees. The throat is deep reddish-purple. Spring bloomer. Mature plants in 6" pots.	\$17.50
13	CATTLEYA ENID var. CLARELEN - - - - - These plants are good producers of cut flowers. They have two peaks of bloom — February to June and September to December. Mature plants in 6" pots.	\$40.00
18	BRASSOCATTLEYA MARGUERITE FOURNIER (B. <i>Digbyana</i> x C. <i>labiata</i>) - - - The margin of the lip is deeply fringed. The lip has the same color of phlox as the petals and sepals except for a large yellowish-green area at the opening of the throat. Mature plants in 4" pots.	\$20.00
34	LAELIOCATTLEYA LEONELLA (C. H. S. <i>Leon</i> x LC. <i>Nella</i>) - - - - - Many of the plants of this hybrid become very floriferous as they grow older. Some of them, in the past, have produced as many as 15 flowers during the growing season—as many as seven large, good textured, well formed flowers per lead. The lip is about the same shade of phlox as the petals and sepals but is set off by a large amount of orange-yellow at the opening of the throat. October to March. Mature plants in 5" pots.	\$40.00
44	CATTLEYA MORNE LE BLANC (C. <i>Edithae</i> x C. <i>Joan Manda</i>) - - - - - These whites bloom mainly in the spring. They are vigorous plants producing two or three flowering leads for the blooming season. Flower quality is good. Many are worthwhile contemplating as studs. Mature plants in 5" pots.	\$50.00
53	LAELIOCATTLEYA OCONTO (LC. <i>Cantara</i> x C. <i>Tityus</i>) - - - - - Flowers of medium orchid shade. The throat is variously ornamented with veins and areas of orange-yellow. The expanded part of the lip is darker than the petals and sepals; the throat is intermediate. The blooming season is from September to January. Mature in 5" pots.	\$75.00
54	BRASSOLAEIOCATTLEYA LANGLADE (BLC. <i>Gold Wings</i> x BLC. <i>Llewelyn</i>) - - - Their large bold flowers appear throughout autumn, winter and spring, although they have a greater tendency to bloom in December and January. The flowers are of medium depth in color, but some plants are white with purple lips. Mature plants in 6" pots.	\$30.00
56	BRASSOCATTLEYA JUNEAU (BC. <i>Tashmit</i> x C. <i>Mossiae</i>) - - - - - Exists in two types with flushed or light phlox colored petals and sepals. The lip is mottled with a deeper purple and has a yellow area at the opening of the throat. Spring and early summer. Mature plants in 6" pots.	\$40.00
59	LAELIOCATTLEYA ALPHAND (LC. <i>Callistoglossa</i> x C. <i>Fabia</i>) - - - - - Flowers have nice shape and texture. The depth of color varies from pale to dark phlox purple. The lips are frequently long and very dark. Bloom in the last half of the year. Mature plants in 6½" pots.	\$25.00
60	LAELIOCATTLEYA OXFORDENSIS (LC. <i>Callistoglossa</i> x C. <i>Tityus</i> var. <i>Superba</i>) - - Petals and sepals are dark to medium dark. The throat of the lip is frequently long, dark on its upper surface and yellow below as the considerable amount of yellow within shows through. The expanded portion of the lip is dark purple. Mature plants in 6½" pots.	\$30.00
549	CATTLEYA HARDYANA var. SANDERIANA (C. <i>gigas</i> var. <i>Sanderiana</i> x C. <i>Dowiana</i>) - This variety is the brightest of all the phlox colored types we know. The lip, both throat and expanded part, is of velvety rich deep purple, and is ornamented with clear cut Dowiana type veins on the flange and eyes elongated into bars on either side of the mouth. Chiefly summer. Mature plants in 5½" pots.	\$45.00

Clarelen Orchids

Plant No.	NAME AND DESCRIPTION	Price per Pot
3055	CATLEYA AMABILIS (C. labiata var. autumnalis x C. gigas var. Sanderiana) - - The unusually brilliant lip of the gigas variety has carried through in the hybrid, giving a flower of fine form, medium dark, with considerable yellow in the throat. Mature plants in 4½" pots.	\$35.00
<h2>CYMBIDIUM</h2>		
255	CYMBIDIUM PRESIDENT WILSON x C. ERICA SANDER - - - - - The President Wilson parent is a free flowering white of good substance and size with purple areas on the lip and flushed on the back side with pink. The Pitt variety of Lowianum was used in producing it. The Erica Sander parent is a fine example of this chaste green flower whose cream-colored lip is marked with brown areas at the borders. Seedlings in community pots.	\$17.50
261	CYMBIDIUM PRINCESS INGRID x LOUIS SANDER - - - - - The Princess Ingrid used as a seed parent has dark reddish pink flowers. The pollen parent has large white flowers with purple markings on their lips and faint suffusion of purple on their back sides. Seedlings in community pots.	\$15.00
266	CYMBIDIUM EGRET x ERICA SANDER - - - - - Both parents bear flowers which have green petals and sepals contrasting with cream colored lips. Faun-brown spots are scattered sparsely over the expanded portion of their lips. Seedlings in community pots.	\$15.00
267	CYMBIDIUM SAVANNAH x C. JOYFUL - - - - - The Savannah parent is a cross between President Wilson and Joy Sanders. It has a yellow background flushed and veined with brown. Joyful has a yellowish-brown background with a darker midregion in the sepals and is veined with pink. Both have lips marked with a Lowianum type area of reddish-brown and both produce a large number of flowers per spike. Seedlings in community pots.	\$17.50
273	CYMBIDIUM LOWIANUM x C. (ALEXANDERI, WESTONBIRT var. x GLORIANA) - - The species produces long drooping spikes bearing many yellow-green flowers. Their lips are cream, each marked with a distinctive bar across the front portion. The other parent is a superior yellow-bronze flowered type selected from the variety within this hybrid. The lip is marked with large reddish-brown spots. Seedlings in community pots.	\$17.50
4	CYMBIDIUM ALEXANDERI, WESTONBIRT x var C. PEREGRINE - - - - - The plant of Peregrine used to mate with this famous variety of Alexanderi is a fine early-blooming type. Both parents are of great value for cut flower purpose. Seedlings in 2½" pots, ready for transplantation to 3½" pots.	\$10.00
159	CYMBIDIUM FLAME (Cymb. Louis Sander x Cymb. Ceres var. F. J. Hanbury, F.C.C., R.H.S.) - - - - - The Louis Sander parent produces large, heavy, nicely formed, flushed white flowers. The Ceres used is a rich dark flowered variety which produces a goodly number of blooms per spike. Seedlings in 2" pots.	\$6.00
2145	CYMBIDIUM RHODA (Cymb. Flamingo x Cymb. Pauwelsii) - - - - - Free flowering plants with pink flowers. The petals and sepals are in general well veined. The lip is variously marked with reddish-purple areas. Mature plants in 6" pots.	\$32.50
2158	CYMBIDIUM MIREBELAIS (Cymb. Alexanderi var. Hamilton Smith x C. Warbler) - - Most plants have pink flowers, although some have yellow, yellow-green, or yellow suffused with pink. The lips have reddish-purple spots and blotches. Mature plants in 6" pots.	\$35.00

Clarelen Orchids

Plant No.	NAME AND DESCRIPTION	Price per Pot
2160	CYMBIDIUM JOYFUL (Cymb. Ceres x Cymb. Joy Sander) - - - - - The flower color ranges from light cream to darker shades of brown. The lips are marked with areas of madder-purple. The Fire King variety of Ceres and the Rio Tinto variety of Joy Sander were used as parents. Mature plants in 6" pots.	\$35.00
2163	CYMBIDIUM PAPILLON (Cymb. Butterflyfly var. Regina x Cymb. Ceres var. F. J. Hanbury) The flowers of this hybrid range through yellow-green, yellow, and pink. The lips are variously marked with purple and reddish purple. Mature plants in 6" pots.	\$30.00
2169	CYMBIDIUM GREEN SCAMP (C. Lowio-grandiflorum x C. Mirabelle) - - - - - The flowers are green or yellow-green and may be veined or flushed with brown. The background of the lip is cream and is brightened by a reddish brown Lowianum type marking. Mature plants in 5" pots.	\$42.50
3027	CYMBIDIUM ALDIS LAMP (Cymb. Alexanderi x C. Carisbrook) - - - - - The Alexanderi influence is very pronounced in this hybrid. The flowers are large, have good texture. The background color, so far, has been some shade of cream and is not pronouncedly veined or flushed. The lip is marked with a variety of spots. Mature plants in 4½" pots.	\$32.50
148	CYMBIDIUM JOY SANDER x INCA II - - - - - This Joy Sander was produced by mating the Compte de Hemptinne var. of Pauwelsii with the F. J. Hanbury var. of Ceres. It has striking dark flowers. 3" pots.	\$6.00
2162	CYMBIDIUM JANETTE (Cymb. Joy Sander x Alexanderi var. Westonbirt) - - - - - The flowers of this hybrid are white or white flushed with pink. The lips are marked with purple. Mature plants in 5" pots.	\$60.00
2142	CYMBIDIUM CORIDON (C. Insigne-Sanderi x Princess Astrid) - - - - - Flowers are pink. The margins of petals and sepals are darker than the mid region. Lips marked with yellow and small dark spots. 6" pots.	\$30.00
3025	CYMBIDIUM CARACOL (Cymb. Coningsbyanum x Caprice) - - - - - Two species, grandiflorum and insigne Sanderi, which have contributed so many outstanding hybrids, occur rather recently in the parentage of this hybrid. Mature plants in 5½" pots.	\$35.00
3036	CYMBIDIUM LOUIS SANDER (Cymb. Ceres x Alexanderi Westonbirt) - - - - - This hybrid produces flowers of superior texture and coloring. Mature plants in 5½" pots.	\$45.00

CYPRIPEDIUM

1210	AUREUM LACKENSE x CHESHAM - - - - - The good-sized white standard is marked with a central area of light purple.	\$20.00
1213	GOLD MOHUR x J. M. BLACK, BECKSTON'S var. - - - - - The standard is nicely spotted on white and green. The flowers are well proportioned and of good size.	\$35.00
1874	CYMBELINE (Evenlode x Hesketh) - - - - - Rich brown sepals and pouch. The dorsal sepal is white and spotted with deep purple. A large nicely marked flower.	\$50.00

Clarelen Orchids

Plant No.	NAME AND DESCRIPTION	Price per Pot
1946	ANITA x SANACDERAE, CRAVEN'S var. - - - - - The petals and pouch are greenish-yellow. The upper half of the standard is white; the lower green, marked with fine purple spots.	\$20.00
1947	BAHRAM (Anita x Grace Darling) - - - - - The flowers have yellow-green petals, pouch and basal portion of standard. Petal margins are nicely undulated.	\$20.00
1954	BURNHAM x WARRIOR - - - - - Flowers are of good size and conformation. Purple spots are nicely disposed over white and green areas of the standard. Petals and pouch are a warm brown.	\$30.00
1956	BURNHAM x ALDERMAN - - - - - Flowers are well formed. Standard has mid-stripe of purple and is mostly white. The remainder of the flower is tan, the petals having a darker mid-stripe.	\$30.00
1971	CAPPA MAGNA x HIAWATHA var. ST. MARY'S - - - - - Plants of this hybrid produce flowers which resemble hirsutissium in shape and disposition of floral parts. The standard may be green or cream, ornamented with closely grouped dots of brown. The petal tips are either mahogany or purple.	\$20.00
1973	CHESHAM x FLORENCE SPENCER - - - - - White dorsal sepals ornamented with dark purple or reddish purple spots of various sizes.	\$30.00
1976	CHESHAM x GWENPUR - - - - - The standard is broad and almost entirely white. The central part and basal third is colored with reddish purple which may be diffused to some extent.	\$30.00
1992	GOLDEN MORN x MERLIN - - - - - Some plants have flowers with a large white area in the standard, marked with a central, purple stripe and spots of small size. Pouch and petals are yellow green suffused variously with brown.	\$20.00
1997	GOLD MOHUR x J. M. BLACK - - - - - The petals and pouch are a richly shaded brown. The standard is marked with dark purple spots of various sizes.	\$25.00
2030	MACORSLEY (Macaw x Worsleyii A.M.) - - - - - Bright flowers of good size and texture. Petals and sepals are deep reddish brown to almost dark wine-colored and glossy. The standard sepal is marked heavily with irregular areas of wine red. A few plants have spotted standards.	\$30.00
2031	VIGOROUS (Cappa Magna var. F. Sander x Spicerianum) - - - - - Flowers are medium size and rounded shape. The standard is clear, velvety and white. Pouch and petals are green.	\$25.00
2033	CASCADE (Etta x Lucullus) - - - - - Pouches and petals are flushed with reddish purple. The standard is spotted boldly with large purple areas.	\$30.00
2036	ERIAD (Grey Friar x Eventide) - - - - - Standard sepal is almost entirely of a color near amaranth purple although the upper part may be clear white. The petals are tan flushed with red; the pouch is lighter.	\$50.00
2038	ONESCA (Norreys x Cameo) - - - - - Flowers have good texture and size. The dorsal is white and is ornamented with purple ture are outstanding. The pouch and petals are ruddy brown.	\$45.00

Clarelen Orchids

1947	BAHAM (Anita x Grace Darling)	gins are nicely undulated.
1954	BURNHAM x WARRIOR	Flowers are of good size and conformation. Purple spots are nicely disposed over white and green areas of the standard. Petals and pouch are a warm brown.
1957	BURNHAM x ALASKA	Flowers are well formed. Standard has mid-stripe of purple and is mostly white. The remainder of the flower is tan, the petals having a darker mid-stripe.
1957	CAPA MAGNA x HAWAIIA var. ST. MARY'S	Flowers of this hybrid produce flowers which resemble hirsutissimum in shape and disposition of floral parts. The standard may be green or cream, ornamented with closely grouped dots of brown. The petals are either mahogany or purple.
1958	CHESHAM x FLORENCE SPENCER	White dorsal sepals ornamented with dark purple or reddish purple spots of various sizes.
1958	CHESHAM x GWENBUR	The standard is broad and almost entirely white. The central part and basal third is colored with reddish purple which may be diffused to some extent.
1958	GOLDEN MORN x MERLIN	Some plants have flowers with a large white area in the standard, marked with a central purple stripe and spots of small size. Pouch and petals are yellow green suffused variously with brown.
1957	GOLD MORN x ...	The petals and ... purple spots of various sizes.
2030	MACORSEY (Macaw x Worsleyii A.M.)	Almost dark wine-colored and glossy. The standard sepal is marked heavily with irregular areas of wine red. A few plants have spotted standards.
2031	VIGOROUS (Capra Magna var. F. Sander x spicatum)	Flowers are of good size and conformation. The standard is of a warm yellow and white.
2032	CASCADE (Ella x Lucille)	Pouches and petals are flushed with reddish purple. The standard is spotted boldly with large purple areas.
2033	ERAD (Gray Friar x Everette)	Standard sepal is of a color with a narrow purple stripe. The petals are tan flushed with red, the pouch is lighter.
2034	...	The pouch and petals are ruddy brown.

Charles F. ...

Plant No.	NAME AND DESCRIPTION	Price per Pot
2044	WOLSTED (Swallow x Easter Hero) - - - - - Standard sepal is largely white with well distributed purple spots. Its shape and texture outstanding. The pouch and petals are ruddy brown.	\$60.00
2049	DALLA (The Ghurka x Luna, A.M. var.) - - - - - There are several varieties within this group of hybrids. One has glossy green floral parts. The petals and the lower one-third of the standard are marked with dark mahogany. The other type has a somewhat broader standard which has a white background spotted centrally with brown on a cream background.	\$35.00
2051	ATRA (Gold Mohur x Golden Wren) - - - - - Standard sepal has dark spotting over green background. Petals are flushed brown. Large and striking.	\$25.00
2076	BROTHER CARLMAR (Cardinal Mercier x Grey Friar) - - - - - This hybrid exists in a surprising diversity of forms and patterns of coloration. All are superior, however, in size, shape, texture, and quality of color.	\$60.00

DENDROBIUM

1412	DENDROBIUM DERONVILLE (D. Lady Coleman x D. Queen of Gatten) - - - - - An early spring blooming hybrid of the nobile type. When handled properly the plants produce a good number of flowers per cane. Mature plants in 3" pots.	\$25.00
2096	DENDROBIUM NOBILE var. ROTUNDUM (species) - - - - - Canes not as tall as in the species proper. Flowers are of medium size and rounded shape, and have flushed petal tips. Spring. Mature plants in 3" pots.	\$12.50

PHALAENOPSIS

197	PHALAENOPSIS BOULDERI (Phal Venustus x Phal. amabilis var. Elizabethae) - - - Both parents used in this cross have large white flowers with good substance. The plants are ready for transplantation and should bloom within a year. Seedlings in community pots.	\$25.00
30	PHALAENOPSIS VENUSTUS (P. Gilles Gratiot x P. amabilis var. Elizabethae) - - - Flowers are white and have nicely disposed parts. Size is large and texture medium to very good. Mature plants in 5" pots.	\$35.00
204	PHALAENOPSIS JEANNE D'ARC x P. GILLES GRATIOT Vigorous progeny of this mating between two white flowered forms selected for good texture and well filled flowers. Plants packed in sphagnum ready for 3 pots - - - - - \$5.00 Plants packed in sphagnum ready for 4 pots - - - - - \$10.00
